

Proforma Conferencing's ProWeb is a feature-rich yet easy-to-use and affordable web conferencing solution. For your convenience we have prepared this feature comparison matrix.

Proforma Conferencing's ProWeb	WebEx	Feature	Benefit
✓	✓	Presentation Sharing	Allows a participant to share a presentation via a standard Web browser. Allows very high resolution with full screen viewing capability.
✓	✓	Document Sharing	Allows participants to jointly view any document or graphic with high-resolution, multilevel zooming and annotation capabilities.
✓	✓	Application Sharing	Enables conference host to demonstrate and share control of any software application with others in an interactive meeting. Effective for live demos and training.
✓	✓	Browser Sharing	Allows easy sharing of Internet-based information. Control can be passed to any participant, allowing the presenter to guide the navigation and synchronize the browsers of other participants.
✓	✓	Desktop Sharing	Presenters can share anything on their PC system, including any application or file for live demos or training.
✓	✓	Desktop Control Sharing	Permits another participant (for example, customer support personnel or demo leader) to take temporary control of a user's desktop (with the user's approval) in order to provide live assistance or walk through a process on that particular system.
✓ Presenter only	✓	Annotation	Allows each participant to make comments and changes directly to document or presentation during a conference session. Participants can save a copy of the revised content for later review without needing the original application in which the content was created.
✓	✓	Polling	Enables hosts to solicit feedback from participants online.
✓	✓	File Transfer	Users can conveniently upload and download files (File transfer is not needed for sharing content.)
✓	✓	Text Chat	Send chat messages to individuals or all participants.
✓	✓	Security	Works with existing firewall technology, offers unlisted meetings, password protection and encryption to protect sensitive data.
✓	✓	Record and Playback	Digitally record all interaction in a meeting for future playback including edit capabilities.
✓	✓	Event Pre-Registration	Customize a pre-registration page for your event. E-mailed instructions are automatically sent to attendees upon registration.
✓	✓	24/7 Live Technical Support	SupportLive expert technical support is available when you need it (no extra charge).
✓	✓	Training and Meeting Assistance	Pre-conference meeting consultation and product training (no extra charge).
✓	✓	Customer-branded Login Page	Customer logo and colors are integrated into the login page.
✓		Integrated Phone Conferencing	Same entry codes to gain access to phone and web conference. One monthly invoice/statement for both phone and web conferencing usage with summary and detailed reporting.
✓	✓	Video Integration	With a desktop video camera, participants can see video of the host. Does not support multipoint video conferencing.
